

*Is it possible to register any trademark?*

**No. Patent offices have rules and regulations. One of the most common reasons for trademark applications being refused is because the trademark is similar in name and/or in its application to goods or services to a trademark already registered or previously filed by another person.**

**Therefore it is necessary to perform a comprehensive research before submitting an application.**

**We, at National Trademarks, will conduct a TM availability search – Free of charge!**

**Contact us today to verify whether your TM is registerable:**
